Days On Market for Sold Properties

Selling Price per Square Foot

Selling Price per Square Foot

with December of 2010 and 2009.

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The December 2011 Selling Price per Square Foot of \$296 was up 21.6% from \$243 last month and down 3.5% from 307 in December of last year.

Selling Price versus Listing Price Ratio

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The December 2011 Selling Price vs Original List Price of 96.8% was up from 92.2% last month and up from 95.9% in December of last year.

Inventory / New Listings / Sales

This last view of the market combines monthly inventory of Properties for sale along with New Listings and Sales. The graph shows the basic annual seasonality of the market as well as the relationship between these items. The number of New Listings in December 2011 was 6, down 25.0% from 8 last month and down 14.3% from 7 in December of last year.
