Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for January was 98, down 31.9% from 144 days last month and down 51.0% from 200 days in January of last year. The January 2012 DOM was at a mid level compared with January of 2011 and 2010.

Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The January 2012 Selling Price per Square Foot of \$331 was up 15.0% from \$288 last month and down 10.8% from 371 in January of last year.

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The January 2012 Selling Price vs Original List Price of 91.8% was down from 94.2% last month and down from 95.0% in January of last year.

Inventory / New Listings / Sales

This last view of the market combines monthly inventory of Properties for sale along with New Listings and Sales. The graph shows the basic annual seasonality of the market as well as the relationship between these items. The number of New Listings in January 2012 was 21, up 133.3% from 9 last month and down 25.0% from 28 in January of last year.
