Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for January was 98, down 36.4% from 154 days last month and down 42.4% from 170 days in January of last year. The January 2012 DOM was at its lowest level compared with January of 2011 and 2010.

Days On Market for Sold Properties

Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The January 2012 Selling Price per Square Foot of \$528 was down 16.2% from \$630 last month and down 6.5% from 565 in January of last year.

Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The January 2012 Selling Price vs Original List Price of 95.0% was up from 92.1% last month and up from 91.3% in January of last year.
